Glossary

Individual anonymity. The state of not knowing the identity or not having any recording of personal information on or about an individual.

Anonymization process. Whereby the association between a set of recorded information (SRI) and an identifiable individual is removed.

Information Security. Preservation of the confidentiality, integrity and availability of information.

Monitor. Carrying out an activity for the purpose of detecting, observing, copying or recording the location, movement, activities, or state of an individual.

Personal Data. Any information relating to an identified or identifiable natural person ("data subject"); an identifiable person is one who can be identified, directly or indirectly, in particular by reference to an identification number or to one or more factors specific to his physical, physiological, mental, economic, cultural or social identity.

RFID Application. An application that processes data through the use of tags and readers, and which is supported by a back-end system and a networked
